EXPERIENCE

EXPERTISE

BOOST YOUR BUSINESS OUTPUT

By complementing your conveyor system with optimum conveyor belts for your application.

Our know-how, experience and the versatility of our products make Sempertrans a partner of choice to ensure safe and highly efficient conveying even under the most demanding conditions.

OVER 50 YEARS OF EXPERIENCE

For more than 50 years, Sempertrans has been manufacturing high-quality steel cord and textile conveyor belts to help customers accelerate their operational performance. With production facilities in Poland and India, Sempertrans is one of the largest and most technologically advanced conveyor belt manufacturers in the world.

Sempertrans is part of the Semperit Group, which has been a worldwide leading supplier of natural and synthetic rubber products for more than 190 years.

WE SUPPLY SOLUTIONS BEST SUITED TO YOUR SPECIFIC NEEDS

At Sempertrans, we see ourselves as partners that help you find optimal conveyor belting solutions for your application. Everything we do is guided by one clear goal in mind: we create added value by making your entire conveyor system as safe, efficient and reliable as possible.

Besides the supply of conveyor belts with excellent cost-to-benefit ratio, Sempertrans offers critical support at all stages of your project. We are at your side anywhere and anytime to provide you with tailored technical consulting and field services.

By choosing Sempertrans, you get the best out of your conveying installation: enhanced productivity and efficiency through reliable material transport in addition to reduced operating costs.

APPLICATIONS

Mining

- Open-pit mining
- Underground mining
- Lignite and hard rock mining

Steel industry

Cement industry

Harbours

Other industries

- Aggregates
- Chemical industry and fertilisers
- Grain and sugar industries
- Overland conveyors
- Packing industry
- Paper and wood industries
- Power and heating plants
- Recycling industry
- Salt industry

OUR ADDED VALUE: COMPLETE SOLUTION PROVIDER

QUALITY FOCUS

We engage in all processes of manufacturing a conveyor belt, from creating our own belt design to mixing our own compounds and producing our own steel cords – ensuring total control over the technical construction and properties of our belts

PROJECT OPTIMISATION

We guarantee customised project management, from start to finish, making your goal our own. Commercial and technical specialists can provide you with key advice and support to help you achieve top levels of performance

TECHNICAL CONSULTING

Our Global Application Engineering team puts their extensive expertise at your disposal to optimally identify your needs and provide custom design recommendations far in advance of the production process

DEDICATED FIELD SERVICE

Our highly mobile specialists provide installation, splicing and maintenance support worldwide to help keep your conveyor up-and-running with maximum efficiency. They identify performance issues and recommend improvement solutions

OPTIMISE YOUR CONVEYOR PERFORMANCE WITH DURABLE BELTS

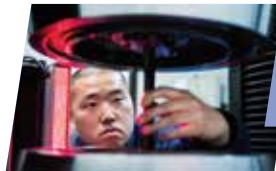

GENERAL SOLUTIONS	Multitrans Multi-purpose textile belt for general to highly demanding applications	Flextrans Straight warp textile belt with cut & rip resistance	Sempercord Steel cord belt with the highest strength and longest service life	Metalcord Steel belt design with outstanding impact and cutting resistance	Metaltrans Metal belt with a unique steel carcass for higher impact & tear resistance
					
	Autostable Unique self-centring belt to prevent from running off-track	Transpipe Engineered solution for material and environmental protection	Ripstop Unbeaten reference in impact protection, with a textile or metal option	Translev Reference for elevator belts, available with steel or textile construction	Transunit Conveyor belt for cargo and piece goods transportation
					
	Transdura Anti-abrasive and cut & gouge resistant cover for longer life span	Transflam Flame retardant cover for uncompromising safety in underground applications, power generation and tunnelling	Transoil Protection against chemicals, grease, vegetable and mineral oils or fats	Transtherm Cover for high temperatures ensuring the longest belt life	TransEvo Energy savings of up to 25% and operating cost reduction

COMMITMENT TO QUALITY

Sempertrans places the utmost importance on the quality of its products and services. Our conveyor belts are specifically engineered to meet the most demanding and stringent global customer specifications and, as a result, have earned a strong reputation across the globe for their established high performance and versatility level.

Sempertrans conveyor belts comply with many national and international standards. Regular execution of laboratory and test bench checks throughout the manufacturing process ensures compliance with these standards.

COMPETENCE CENTRE

R&D
Market-oriented product innovations and resource optimisation

APPLICATION ENGINEERING
From conveyor belt design and optimisation for first-time custom installations to replacement projects

FIELD SERVICE
Splicing expertise for conveyor belt lifetime optimisation and faster turnaround

LIFECYCLE MANAGEMENT

Sempertrans partakes in all stages of the conveyor belt production process, with the involvement of skilled professionals who are experts in their field. This way, we possess greater flexibility to conceive product solutions which meet the changing demands of the market.

As a customer, you benefit from continuous quality control and robust, long-lasting belts to support your transport projects.

GLOBAL REACH

Sempertrans operates globally, making it easy for you to carry out important projects in any country in the world. Our conveyor belts are produced in two sites strategically located to reach the destination of your choice – anywhere our products and services are required for your business operations, resulting in reduced lead and delivery times.

Our international network of commercial and technical experts are always at your disposal anywhere you are to guarantee diligent project development and follow-up. These are mobile and multilingual sales representatives, as well as distribution and service partners whose physical proximity to your business locations allows for more effective project handling and better understanding of your markets.
